

Project Initialization and Planning Phase

Date	21 June 2026
Team ID	
Project Name	EduGenie
Maximum Marks	3 Marks

Define Problem Statements (Student Problem Statement Template):

Created a problem statement to understand the needs and challenges of students using EduGenie, an AI-powered educational platform. This template helps identify learners' pain points, enabling the development of personalized educational solutions such as concept explanations, content summarization, quiz generation, and learning path recommendations. A well-defined problem statement allows the team to design features that address real learning challenges while improving the overall user experience. By understanding students' perspectives, the team can develop an intelligent educational assistant that makes learning more accessible, interactive, and effective.

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A first-year engineering student	Understand difficult technical concepts quickly	Textbooks are too complex and time is limited	Learning materials are not personalized	Frustrated and overwhelmed
PS-2	A student preparing for semester exams	Revise multiple subjects efficiently	There is too much content to cover	I don't know which topics matter most	Anxious before exams

PS-3	A self-learner	Practice with AI-generated quizzes	Finding quality practice questions is difficult	Most platforms don't provide instant feedback	Unsure about my progress
PS-4	A beginner learning a new skill	Follow a structured learning path	Resources are scattered across many websites	I don't know the correct learning sequence	Confused and demotivated
