Coding & Solution

This section evaluates the implementation and overall quality of the EduGenie platform. It highlights the successful development of the application's core features, adherence to clean coding practices, modular design, and compliance with the project's functional and non-functional requirements, ensuring a reliable and maintainable AI-powered educational solution.

Instructions:

- 1.Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
- 2.The solution should address the core problem statement and implement the key functional requirements.
- 3.Include all source files, configuration files, and setup instructions needed to run the application.
- 4.Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Field	Details
